- КОМАНДЫ:
 - echo "test" » /home/guest/dir1/file1

A terminal window with a dark background and light text. The title bar at the top reads 'guest@ubuntu-'. The terminal shows a sequence of commands and their outputs: first, 'echo test » /home/guest/dir1/file1' is entered and executed, resulting in 'test' being printed on the next line. Then, 'cat /home/guest/dir1/file1' is entered and executed, also resulting in 'test' being printed. The prompt is now ready for the next command.

```

guest@guestbook:~$
```

- КОМАНДЫ:
 - `chmod 000 file1`

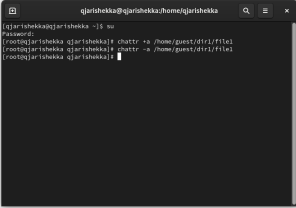

A terminal window titled 'guest@kali:~/kali' showing a series of failed commands. The user attempts to run 'ls -l file1', which returns 'ls: cannot open 'file1': No such file or directory'. Then, the user runs 'chmod 000 file1', which returns 'chmod: changing permissions of 'file1': Operation not permitted'. The prompt returns to the user, and the cursor is visible on the next line.
